

# Digital Media Design

## Class Information:

Mass communication is a primary source of information for young people today. Understanding this and thinking critically about the messages are essential skills in a consumer based society such as ours. In this course students will not only study media in all its forms, but also have the opportunity to develop skills in producing a variety of media through project-based learning experiences.

♦ Course grade will be based on performance in these areas:

- ▣ Assigned Projects
- ▣ Group Work
- ▣ Class Participation
- ▣ Individual Projects

## Course Content:

- Media Literacy
- Multi-media Presentations
- Desktop Publishing
- Digital Photography
- Digital Photo Editing
- Video Production
- Video Editing
- Current Issues

Project schedules and assignment info can be accessed on the Digital Media webpage.

## Computer Class Expectations

- Respect
- Responsibility of the cameras and equipment when in class.
- Reliability

## Consequences

- The use of all technology equipment is based on a students ability to respect the equipment and others. All computer and technology privileges may be revoked and alternate projects assigned if necessary.

I understand the computer class expectations and will abide by Willard Middle School's computer lab policies.

Student: \_\_\_\_\_

I understand the computer lab policies and expectations and give permission for my child to use Internet and lab equipment while under supervision of the computer teacher or a substitute.

Parent: \_\_\_\_\_
